As a paying member of XM radio services I dont understand what business it is of the NAB's that i recieve traffic and weather on my XM radio. As this service is much better and of higher quility than any thing that I have locially available to on eather AM or FM. I truly want to keep it as my weather and traffic info service as this is the only radio I currently listen to.

If you were going to restrict the types of services that the XM service could supply that should have been done long before they launched their sattilites into orbit

I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I deserve and ask for from me radio service provider (XM).

Thank You
Yours Truly
